The Future of Accessible Content
with AI Technology

Agenda

1. Introduction
2. The Current Situation: “Stress Mode”
3. The Solution: Recognize & Anticipate Requirements
4. How AI Tech Makes the Difference
5. Verbit’s AI Technology
6. CommonLook’s AI Solution
7. Case Study: George Mason University
8. Q&A

Who is here?

Robert Starr,

Accessible Media Coordinator at
George Mason University

Shir Ibgui,

Marketing Manager,
Verbit

David Herr,

Director of Marketing,
CommonLook

Don Behrman,

Director of Sales & Marketing,
Verbit

The Current Situation: “Stress Mode”

- ❏ Many universities are creating accessible materials for an individual upon request (reactive approach)
- ❏ Unexpected ADA litigation causes stress for the whole university
- ❏ When a university is under litigation, the requirements are for an immediate solution, so much pressure to address the issues quickly
- ❏ Lack of staffing resources and budget to convert the amount of material needed to get in compliance
- ❏ Push back: Lots of difficulty to push the professors to take this seriously, difficult for the university staff to handle all accessibility work in-house

#1: Facing Litigation or Under Investigation

- 🚩 UC-Berkeley
- 🚩 Harvard and MIT
- 🚩 Fordham University
- 🚩 The University of Minnesota Duluth published a good list of Higher Education Institutions dealing with Web Accessibility lawsuits and complaints <https://www.d.umn.edu/~lcarlson/atteam/lawsuits.html>

#2: Reacting to a Time-Sensitive Student Request

- 🚩 In many cases, the disability services department at a university will be required to convert the class materials to an accessible format. This is what George Mason does currently as Robert will discuss later in the presentation
- 🚩 For Time-sensitive work, the accessibility work can be outsourced, CommonLook does PDF remediation work on demand for many universities
- 🚩 This approach works for individual students and does not ensure that the overall accessibility is being met for the general population, it is just solving the problem for one student at a time. Liability risks are still there for the overall university's web site and LMS systems
- 🚩 Because this done based on demand, it is very seasonal, so there may not be resources available to meet the demand during off season times

Poll

1. On a scale of 1-10, how accessible is your course content?
2. Have you ever faced a litigation?
3. Do you consider your school more proactive or reactive?

The Solution: Recognize & Anticipate Requirements

How AI Tech Makes a Day to Day Difference

Google Maps & Waze

Siri & Alexa

How AI Makes a Difference in Education

According to the Artificial Intelligence Market in the US Education Sector report, it is expected that artificial intelligence in U.S. Education will grow by 47.5% from 2017-2021.

(Forbes)

CommonLook's AI Tech & Services

Currently Higher Education is using one of the following methods to ensure PDF content is accessible:

- ❏ Manually tagging and remediating content using Adobe Acrobat DC
- ❏ Using tools like CommonLook PDF and CommonLook Office to improve efficiency for remediation work
- ❏ Converting content to another format
- ❏ Outsourcing Remediation of PDF documents (make sure they certify their work!)

INTRODUCING

CommonLook AI Cloud

CommonLook AI Cloud

- **Patent-pending technology** for improving the speed and accuracy of PDF remediation services using advanced machine learning.
- The initial release of our solution will be a **cloud-based portal** for uploading of documents to be processed by our proprietary CommonLook tool.
- The files will then be tested by our remediation services team and delivered to back to the client as **100% compliant PDF documents**.

AI Cloud Features

- Portal for managing documents submitted for remediation
- Software designed to learn from your existing documents
- Best use case is for large quantities of similar documents
- Large quantities of documents can be quickly remediated
- Highly accurate remediation
- Files are final tested for 100% compliance by our professional remediation team

AI Cloud Benefits

The first in a series of CommonLook AI tools that will be released in the coming year.

Major Benefit:

Allows organizations to remediate large volumes of PDF documents for much less than the cost of traditional manual remediation.

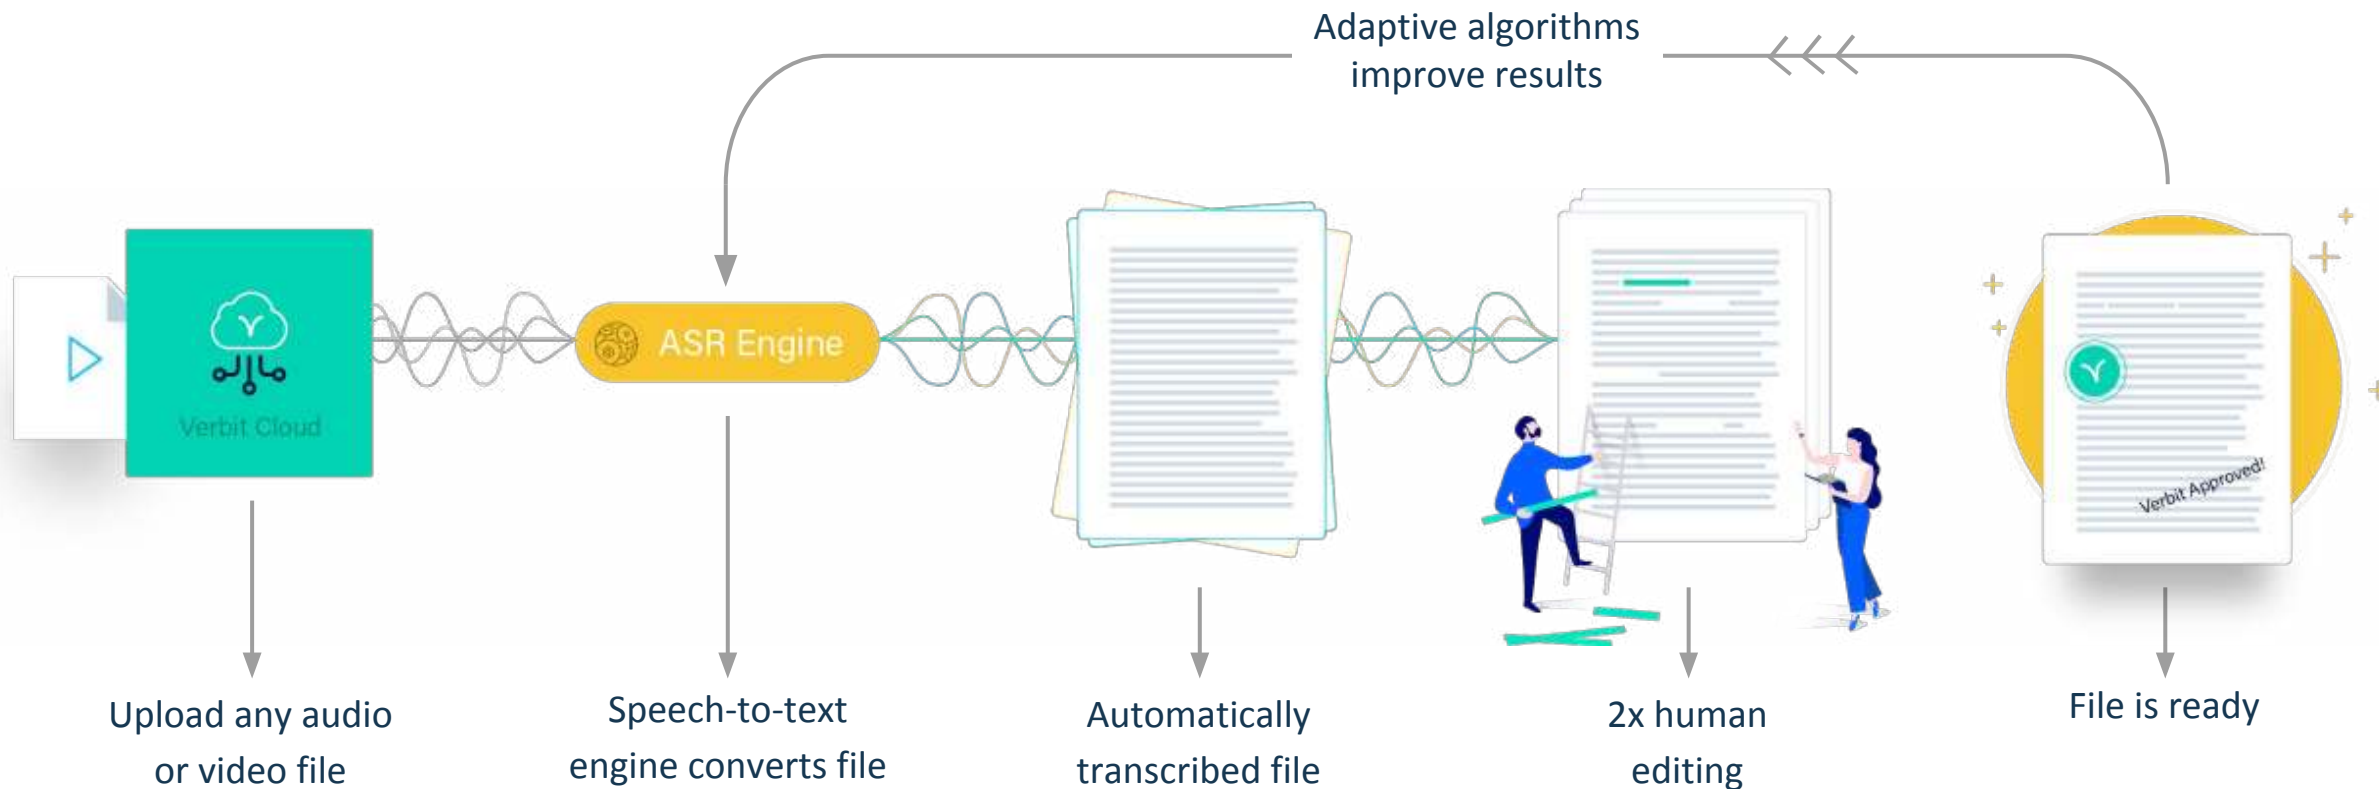

CommonLook AI Partnership Program

- Looking for a limited number of customer partners who will participate in an early stage pilot program.
- Benefits include access to technology that ensures documents are 100% compliant with the standards, provided at a fraction of the current cost of remediation.
- If you are interested in learning more about this leading-edge program, please fill out the CommonLook AI Partners request form here: www.commonlook.com/ai-partnership

Verbit's AI Tech

Poll

1. What do you use AI technology for in accessibility?
2. Would you be willing to pilot AI technology on your campus?
3. What is the most important decision-making factor when purchasing a new assistive technology platform solution?

Case Study: George Mason University

Problem

Accommodating an increasing number of students with print/video access

- Blind/Visual Impairment
- Deaf/Hard of Hearing Impairment
- Learning Impairment
- English as Second language

Issues with lack of timely access to instructional materials

- Lack of communication
- Lack of staffing
- Lack of process

Solution

Document Accessibility Program

- 1 full time staff, 1-2 student workers
- Remediate all course and university documents (Word, PPT, PDF)
- CommonLook, Acrobat
- Avg. turnaround – 14.6 days FY18, 8 days FY19

Video Captions/Transcripts

- Outsource
- Time Saving
- Cost Saving
- Scalable

Partner with Office of Disability Services and Office of Digital Learning

GMU - Document Remediation

Fiscal Year 2018

Faculty/Staff Participants:

40

of Docs Processed

498 documents

7,956 pages

By Format

196 PPT (39%)

147 Word (30%)

155 PDF (31%)

Type of Request

49% Compliance (244 requests)

51% Disability Accommodation (254 requests)

Fiscal year 2019

Faculty/Staff Participants

59 (47.5% ↑ over FY18)

of Docs Processed

702 documents (41% ↑ over FY18)

10,160 pages (28% ↑ over FY18)

By Format

295 PPT (42%)

131 Word (19%)

276 PDF (39%)

Type of Request

52% Compliance (368 requests)

48% Disability Accommodation (334 requests)

GMU - Video Captions/Transcripts

Spring 2019 Semester

Faculty/Staff Served: 79

of videos processed: 1,277

Total # of minutes: 19,733

65 Courses

- ✓ Accommodation: 209 videos (16%)
- ✓ Compliance: 1,079 videos (82%)

11 Departments

- ✓ GMU Website: 24 videos (2%)

Historical Data by Semester

Q&A

All questions asked throughout the webinar from the comments section will be answered here.

Thank you
