

# Real-Time (CART) Transcription Just Got **alot** Smarter

Today everything is on-demand. Verbit now provides a real-time (CART) service for transcription and captioning that doesn't compromise on accuracy. Our audio transcription software fuses artificial intelligence and human intelligence to deliver results accurately in real time and 10x faster than the competition. You can schedule and cancel CART services with one click and receive a rough draft of the transcript immediately after a session. You'll receive professional human transcribers with each session and continuous customer support to ensure a best-in-class experience. Let Verbit meet and exceed your ongoing transcription and captioning needs in real-time.

## How It Works

"The real-time captioning aspect exceeded my expectations. The level of accuracy was impressive and really provided an exceptional service for those in need. Our overall goals of a smooth collaboration to provide a successful event were met and surpassed."

- Eric Moore, PhD, UDL Specialist and Higher Education Consultant, University of Tennessee, Knoxville

"The real-time captioning speed was highly accurate and met our expectations in providing robust communications to our [conference] guests. The collaboration between VT and Verbit within 24 hours of the event greatly assisted in testing the Verbit platform...to ensure a positive experience for all participants."

- Mark Nichols, Senior Director Universal Design and Accessible Technologies, Virginia Tech

## Benefits

### Easy Scheduling

Schedule sessions online 24 hours in advance

### Simple Cancellation

Cancel sessions up to 12 hours in advance at no extra cost

### On-Demand

Run unlimited sessions simultaneously

### High Accuracy

Top accuracy with adaptive AI and professional type correctors

### Cost-Effective

Save money with prorated pricing and no setup fees

### Full Transcript

Receive a full transcript immediately following the session

## Our Integrations, Partners & Customers

Verbit's smart transcription and captioning solution harnesses the power of artificial and human intelligence to generate the most detailed speech-to-text files, providing over 99% accuracy, record-breaking speed, and on-demand CART services. Our adaptive AI technology is trained to recognize specific terms and integrate with all major LMS and content management platforms. [Learn more at verbit.ai](https://www.verbit.ai)
