

Verbit & Utah Education Network

Partnership For Captioning & Transcription

Verbit's AI-powered technology recognizes course-specific terms, various accents and dialects and differentiates among speakers for unparalleled accuracy. With Verbit, you can empower your students to achieve better academic results with equal access to course content, events and experiences. Verbit can help to support you in your need to adhere to today's regulations, such as the Americans with Disabilities Act (ADA) and Rehabilitation Act requirements.

Verbit takes captioning and transcription one step above with interactive features:

Search	Customize	Connect
The ability to search within a transcript to find specific terms to enhance studying and referencing	The capability to pre-upload specific, niche words and terms to improve transcript and captioning accuracy	Offering increased equity, plus higher engagement with students to boost comprehension and retention

Verbit's solution is:

COST EFFECTIVE: Automation enables up to 50% cost reduction over manual efforts

ACCURATE: Self-learning algorithms that continuously optimize to reach the highest accuracy levels

FAST: Artificial and human intelligence that deliver results 10x faster in many cases

EASY: Simple, intuitive platform allows users to upload and download files in various formats

CUSTOMIZED: Seamless integrations with all major LMS and video hosting platforms

What other Verbit customers are saying:

“

“Verbit’s solution takes me about 1/10th to 1/20th of the time as the other captioning products that we used. Every type of student, regardless of their disability, I’ve been able to get up and running in 15 minutes.”

- **Suzanne Delahanty**, M.Ed; M.Psy, Alternative Media & Assistive Technology Specialist, Crafton Hills College

“We consider video captions to be an essential part of an inclusive classroom experience, and we have found a partner in Verbit that allows us to quickly and easily caption videos across a variety of platforms.”

- **Christopher Phillips**, Electronic and Information Technology Accessibility Coordinator, Utah State University

Verbit’s integrations, partners and customers include:

Verbit has emerged as the leader in the \$30B transcription industry. The company and its team members are pushing access and inclusion efforts forward at 3,000+ institutions and businesses. With a suite of voice AI-based solutions, simple integrations and the largest professional captioner workforce in the world, Verbit makes delivering access to students easier than ever before. Institutions around the globe are now making their content, events and experiences more engaging and equitable to their communities. Plus, they’re not only able to receive support in meeting accessibility guidelines but are seeing results in making their information searchable and actionable for everyone. Start using Verbit’s unmatched captioning, transcription and audio description today, which can be tailored to meet your needs.
