

Verbit & Utah Education Network Partnership For Captioning & Transcription

Verbit's **AI-powered** technology recognizes course-specific terms, various accents and dialects, and differentiates between speakers for unparalleled accuracy

- **Empower all students** to achieve better academic results with equal access to all course content, regardless of student ability or disability, learning style or language skills
- **Ensure compliance** with regulations such as the ADA and Rehabilitation Act
- **Engage with interactive features:**

SEARCH

Search within a transcript to find specific terms

IDENTIFY

Identify keywords in scripts

CONNECT

Connect students with related content to boost comprehension

Cost Effective

Automation enables up to 50% cost reduction

Verbit is

Fast

Artificial and human intelligence deliver results 10 times faster

Accurate

Self-learning algorithms ensure 99.9% accuracy and continuous optimization

Easy

Simple and intuitive platform allows users to upload and download files in various formats

Customized

Seamless integrations with all major LMS and video hosting platforms

What Our Customers Are Saying

”

The turnaround time, the accuracy, the editing time - all of those things are truly best-in-class.

Valerie Sturm,
Coordinator of Services for the Deaf and Hard
of Hearing, Brigham Young University-Idaho

”

We consider video captions to be an essential part of an inclusive classroom experience, and we have found a partner in Verbit that allows us to quickly and easily caption videos across a variety of platforms.

Christopher Phillips, Electronic and Information Technology
Accessibility Coordinator, Utah State University

Verbit is a leading transcription and captioning solution that fuses artificial and human intelligence to provide 99.9% accuracy at a rate 10 times faster than the industry standard. Built on self-learning algorithms, Verbit is the only platform that leverages contextual data, specific acoustic models and current events to provide each customer with a tailored model that keeps improving with time. Verbit's flexible cloud system includes customizable templates and allows users to upload files directly, via API or through integrations with leading platforms like YouTube, Kaltura, Panopto and Vimeo. An intuitive user interface enables seamless editing, reviewing and collaboration for clients and transcribers alike. Verbit helps customers across the higher education, legal, financial and media industries redefine the way they transcribe, index and access their video and audio files. Founded in 2016, Verbit has secured \$11M in seed funding, led by HV Holtzbrinck Ventures, Vertex Ventures and Oryzn Capital.
